

Project Requirement Analysis Phase

Solution Requirements (Functional & Non-functional)

Date	02 October 2026
Team ID	SWTID-2026-5694
Team Size	4
Team Leader	Praveen Karthik R
Team Members	S Madhan Balaji SS SARANYA SRI VALLI D
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Functional Requirements:

Following are the functional requirements of the proposed automated standard laptop procurement solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Standard Laptop Request	Allow users to select and submit the Standard Laptop item through Service Catalog.
FR-2	Approval Processing	Process the request after the required approval is completed.
FR-3	Automated Catalog Task	Create a Catalog Task automatically from the approved Requested Item.
FR-4	Task Description	Set the short description and description to indicate that the laptop needs to be configured.
FR-5	Hardware Assignment	Assign the created Catalog Task to the Hardware group.
FR-6	Flow Assignment	Associate the created flow with the Standard Laptop service catalog item.
FR-7	Status Verification	Allow the resulting request and Catalog Task status to be viewed and verified.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Standard Laptop request should be straightforward to place and the workflow should reduce manual coordination.
NFR-2	Reliability	Approved requests should consistently create the expected Catalog Task and assignment.
NFR-3	Security	The workflow should respect the ServiceNow approval process before creating the configuration task.
NFR-4	Performance	The automated flow should create and route the task without unnecessary processing delay.

NFR No.	Non-Functional Requirement	Description
NFR-5	Availability	The workflow should operate whenever the ServiceNow application and required request data are available.
NFR-6	Maintainability / Scalability	The flow should be maintainable and adaptable to additional standard procurement automation requirements.
